When requested by this application, and approved by the City (based on funding and necessity), staff will facilitate the installation of streetlights in the following locations:

1. The light must be requested at one of the following locations:
   a. An intersection
   b. Mid-block when 600 feet from any other existing light
   c. On a collector or arterial street (spacing at 300 feet)
2. The requested light will improve traffic safety for a specific road condition and/or safety related problem
3. The street light is at the end of a cul-de-sac. The cul-de-sac must be at least 300 feet in length to be considered for a street light.
4. Overhead or underground power must be present at the location the street light is requested.

Style:
Typically on minor residential streets and cul-de-sacs the City will install town and country style lights (see Section 6 of Street Light Policy). Collector streets in residential and commercial areas shall have Memphis Style fixture and post (see Section 6 of Street Light Policy). Where possible, cobra head lights may be attached to existing wooden utility poles. Town and Country street lights have a lumen brightness of 9,500. Memphis or similar styled lighting fixtures have a lumen brightness of 16,000.

Exact location requested:_____

To validate this application please notify adjoining property owners and/or residents within 300 feet of the proposed street light location and have them sign the back of this form. This is especially important if the proposed location of the street light is not on the applicant's property. Majority of neighbors (over 50%) must approve of the installation of a street light before consideration for approval can be given. All appeals of staff decisions regarding this application shall be made to the City Council.
