Re: Response Letter No. 4  
Review of Geotechnical Study and Slope Stability Analysis  
Proposed Wasatch Rock Development  
6695 Wasatch Boulevard  
Cottonwood Heights, Utah

As part of Cottonwood Heights Sensitive Lands Evaluation and Development Standards (SLEDS) review, Mr. Daniel Brown and Mr. Timothy Thompson of GeoStrata completed a review of our geotechnical study and slope stability analysis dated May 13, 2020<sup>1</sup>, final slope stability analysis dated October 7, 2020<sup>2</sup>, response letter dated July 9, 2020<sup>3</sup>, and response letter No. 3-rev1 dated December 16, 2020<sup>4</sup>. The most recent review comments from GeoStrata are documented in a review letter to Mr. Michael Johnson of Cottonwood Heights City dated January 20, 2021.

As presented in the January 20, 2021 review letter from GeoStrata, comments 4 and 6 - 12 are considered addressed or required no action by G<sup>2</sup>. The general geotechnical and slope stability parameters and recommendations for the development have been addressed and accepted. Comments 1 - 3 and 5 will be addressed through the required SLEDS compliant, design-level geotechnical and geologic hazard studies as finalized building details and site grading plans are completed for each phase of the project.
